Technologies	Node Js, React Js, AWS Lambda, SNS, SES, Cloudwatch, CI/CD Pipeline, S3 Bucket, MySQL, GitHub
Team Size	3
Project Type	Cloud based platform

Name	Mediacont4u
Date	May 2020 - Dec 2020
Description Detail	Mediacont4u is provider content for the text, image, research and other Like audio, video etc. Key features:- ● Authentication and authorization ● Localization ● Real time chat ● Place order ● Accept and deliver order ● Wallet management
Project URL	https://mediacont4u.com/
Role	Developer
Technologies	Node Js, Angular, Laravel, Gitlab, Trello, Shared ubuntu server
Team Size	1
Project Type	Web application

Name	J2
Date	May 2020 - Current
Description Detail	eFax is the global leader in online fax. Send & receive faxes by email. Get a local, toll-free or international fax number. Fax from anywhere with our mobile app.
Project URL	htttps://www.efax.com/
Role	Developer
Technologies	Node Js, AWS lambda, SQS, Cludwatch, Jira, Github, AWS server
Team Size	68
Project Type	Web application

Name	Testo
Date	Dec 2019 - April 2020
Description Detail	A free Cloud access for your WiFi data logger system. You can use it to view and manage the measurement values stored online, and to use the alarm function via email. You can also set up your system in the Testo Cloud – simply follow the step-by-step instructions. Key features:- ● Authentication and authorization ● Localization ● Sync APIs ● Import and export customer data
Project URL	https://app.testocloud.be/login
Role	Developer
Technologies	Docker, Lumen, Laravel, Angular, Git, AWS
Team Size	2
Project Type	Web application

Name	ESP
Date	June 2019 - Dec 2019
Description Detail	Specialised IT integrator providing hardware, software and services for the modern workplace. Key features:- ● Authentication and authorization base on LDAP and AD roles and permissions ● Microservices and api gateway ● Localization ● Auto sync with registered Devices from cloud. ● Track shared devices with employees. ● Manage Pages. Like Control panel, users, groups, permissions, devices, sync and email templates.
Project URL	No
Role	Developer
Technologies	Docker, Microservices, Lumen, Laravel, Angular, Bootstrap, Mysql, AWS, Azure, Sonarqube
Team Size	4
Project Type	Web application

Name	Moon Invoice
Date	Dec 2016 - Jun 2019
Description Detail	Moon Invoice, a free invoice generator app for every need of your online invoicing. Get amazing invoice templates for semi-business and/or professional needs. Key features:- ● Authorization and authentication ● Create company, customer and template ● Generate invoice ● Setting Like - Language, time zone and currency type ● Sync user information from different platform like MAC, Windows, IOS and android
Role	TL
Project URL	https://www.mooninvoice.com/
Technologies	Laravel, Angular Js, Bootstrap, AWS, RDS, SES, ELB, AWS certificate
Team Size	9
Project Type	web application

Name	Astaris
Date	November 2017 - December 2018
Description Detail	Astaris is a government budget application. Key features:- ● Recurrent expenditure ● Recurring revenue ● Recurring capital ● Jasper report ● Elastic search ● Role based system ● Tree structure full database view ● Manage department, ministry and program ● Import and export report based on tree structure selection
Project URL	http://astaris.moontechnolabs.com/
Role	Developer and TL
Technologies	PHP - Laravel, Bootstrap, Mysql and Private ubuntu server, Jasper report, Elastic Search
Team Size	2
Project Type	Web application

Name	Reliyo
Date	April 2018 - December 2018
Description Detail	You can write about any topic and report, publish reports and news. Users can earn money according to his/her article views, comment and type. Key features:- ● Create article ● Like, Comment and views count ● Google adsense integrations ● DFD integrations
Project URL	https://reliyo.com/
Role	Project lead
Technologies	PHP - Laravel,Bootstrap,Js,Mysql,Share Hosting
Team Size	3

Name	Mymedia podz
Date	March 2017 - June 2019
Description Detail	Media Podz are state of the art private recording spaces that provide you with the ability to record high quality audio and video content for marketing, and social media. Key features:- ● Create an account with a third party and auto sync on specific duration of time ● Upload video ● View, play and download video
Role	TL and developer
Project URL	http://mymedia.mediapodz.com/#/
Technologies	Nodejs, ExpressJs, Angularjs, Mysql, AWS

Name	Myfreelap
Date	December 2016 - Feb 2019
Description Detail	MyFreelap application, follow your training and activity, and instantly visualize your performance. Users can create sessions, manage start lists, distance and setting. Key features:- ● Authentication and authorization ● Localization ● Parse and Synch myfreelap device data ● Send low battery notification ● Workout detail like Id, Lap, Split, Distance, speed and live status ● Create group, add member and manage profile
Role	Developer
Project URL	https://www.myfreelap.com/
Technologies	PHP - Codeingiter, Mysql, Bootstrap, Jquery, AWS, SES, Workmail
Team Size	5
